

## VPK Rule 60BB-8.204 Examples

### **Example 1 : Assumptions – 4 hrs Daily, Rate = \$4.71 School Days in Month = 18, 2 absences**

80/20 Threshold : 18 days x 80% = 14.40 days

Absences allowed before adjustment:

$$18 - 14.40 = 3.6 \text{ days rounded DOWN to quarter day} = 3.5 \text{ days}$$

Since 2 days is less than 3.5 days allowed to be paid, NO ADJUSTMENT

$$\text{Total Payment} = 18 \text{ days} * 4 \text{ hours} = 72 * 4.71 = \$339.12$$

### **Example 2 : Assumptions – 4 hrs Daily, Rate = \$4.71 School Days in Month= 18, 4 absences**

80/20 Threshold : 18 days x 80% = 14.40 days

Absences allowed before adjustment:

$$18 - 14.40 = 3.6 \text{ days rounded DOWN to quarter day} = 3.5 \text{ days}$$

Since 4 absences is greater than 3.5 absences allowed to be paid, an adjustment of .5 days will be done.

$$\text{Initial Payment} = 18 \text{ days} * 4 \text{ hours} = 72 * 4.71 = \$339.12$$

$$\text{Less Adjustment} = 0.50 \text{ days} * 4 \text{ hours} = 2.0 * 4.71 = \$9.42$$

$$\text{Total Payment} = \$339.12 - 9.42 = \$ 329.70$$

### **Example 3 : Assumptions – 4 hrs Daily, Rate = \$4.71 School Days in Month= 18, 8 absences**

80/20 Threshold : 18 days x 80% = 14.40 days

Absences allowed before adjustment:

$$18 - 14.40 = 3.6 \text{ days rounded DOWN to quarter day} = 3.5 \text{ days}$$

Since 8 absences is greater than 3.5 absences allowed to be paid, an adjustment of .5 days will be done for the first 4<sup>th</sup> absence AND an additional 1.25 day will be deducted for each absence above 4.

$$\text{Initial Payment} = 18 \text{ days} * 4 \text{ hours} = 72 * 4.71 = \$339.12$$

$$\begin{aligned} \text{Less Adjustment} &= 4^{\text{th}} \text{ day adjustment} = 0.50 \text{ days} \text{ PLUS } 5^{\text{th}} - 8^{\text{th}} \text{ days adjustment} \\ &= 5 \text{ days } (1.25 * 4) \text{ EQUALS a total of } 5.50 \text{ days adjusted} \\ &5.50 \text{ days} * 4 \text{ hours} = 22 \text{ hours} * \$ 4.71 = \$103.62 \end{aligned}$$

$$\text{Total Payment} = \$339.12 - 103.62 = \$235.50$$
